

# Do's and Don'ts

*Metal Surfaces*

*Clean Smooth Walls*

*Windows*

*Ceramic Tiles*

*Plastic Surfaces*

*Powdered Surfaces*

*Textiles*

*Broken Surfaces*

*MDF | Chipboard*

All wall and furniture coverings must be applied to a clean and dry surface which does not contain any 'stain repellent technology' including brands: 'Teflon & Dulux Trade Diamond Paint' as the resins may have a chemical reaction and nullify the adhesive. Please use standard trade matte emulsion and apply three weeks prior to installation date. Note if the wall has previously had stain repellent technology this needs to be removed with sandpaper before you apply your vinyl.

Please ensure all windows are cleaned before you apply your vinyl, without using cleaning liquids which leave a wax residue, as this will affect the adhesive.
